

## Lab/651

### Praeco IIOT SIGNALING DEVICE

*Simply and intuitively integrate with the industrial internet of things*

- Have an industrial sensor send you a text message or email when a digital output changes state or an analog output goes out of range.
  - Message can include value of analog output in mA when sensor is triggered.
- Use your cell phone or web-browser to check on the status of an industrial sensor.
  - PNP output high or low?
  - Value of analog output in mA.
- Works with any industrial sensor with a PNP digital or 4 to 20mA analog output.
- Industry standard 4-wire connection, powered from 10 to 30VDC.
- Simple, intuitive user interface.
- Rugged construction, easily mounted housing.
- Based on the market proven Particle Electron 3G cellular board.

Contact us today for a demo of how easy it can be to connect an industrial sensor to the cloud. Send an email to [newproducts@keystoneautomation.com](mailto:newproducts@keystoneautomation.com) or call 651.439.4268.
